Good Day Doug

Oregon DEQ is submitting the proposed TV permit renewal documents for 45 day EPA review for the following facility:

26-1876-TV-01

Owens-Brockway Glass Container

9710 NE Glass Plant Road

Portland

About the facility

The Owens-Brockway facility produces beverage bottles by recycling post-consumer glass and using other raw materials such as sand and limestone. Owens-Brockway operates two glass-melting furnaces that are the main source of air pollution at the facility. The furnace burns natural gas as the primary source of energy.

Comments were received from the following organizations- *No comments were received from the source, affected states or tribes*

Earthjustice represents the following groups:

The Cully Air Action Team is an organization of community members from Portland's Cully neighborhood that focuses on addressing ongoing air pollution and toxicity in that area.

Oregon Environmental Council is an organization that works to safeguard clean air and water in Oregon.

Portland Clean Air is an organization that works to address industrial pollution in Multnomah and Washington Counties.

Verde is a non-profit organization based in Portland's Cully neighborhood that serves communities by building environmental wealth through social enterprise, outreach, and advocacy.

Oregon DEQ appreciates your consideration on this TV permit renewal.

Best

Edith McMorine
